## EDUCATION

|                                                                                                                              |             |
|------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Pune Institute of Computer Technology, Pune</b><br>Bachelor of Engineering, Electronics and Telecommunication Engineering | 2023 – 2027 |
| <b>Savitribai Phule Junior College, Nagpur</b><br>Higher Secondary Education                                                 | 2021 – 2023 |
| <b>St. Claret School, Nagpur</b><br>Secondary Education                                                                      | 2020 – 2021 |

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, SQL, C++  
**Frontend / Mobile:** React.js, React Native, Expo, HTML, CSS  
**Backend:** Node.js, Express.js, FastAPI  
**Databases:** MongoDB, PostgreSQL, PostGIS, MySQL  
**Tools & Platforms:** Git, Firebase, VS Code

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |      |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>EcoSarathi – Voice-Based Public Grievance System</b><br><i>React.js, Node.js, Express.js, MongoDB, NLP</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 2025 |
| <ul style="list-style-type: none"><li>Developed a full-stack grievance redressal platform enabling users to submit and track complaints through voice inputs in Hindi and Hinglish.</li><li>Designed modular React components for complaint submission, tracking, and dashboard visualization.</li><li>Implemented RESTful backend APIs using Node.js and Express.js to manage complaint workflows and user requests.</li><li>Modeled MongoDB schemas to store structured complaint reports generated from NLP processing pipelines.</li></ul>                                                          |      |
| <b>VanAtma Portal – AI-powered FRA WebGIS Platform</b><br><i>React.js, Node.js, Leaflet.js, PostgreSQL/PostGIS, Python</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 2025 |
| <ul style="list-style-type: none"><li>Built a full-stack WebGIS platform to visualize Forest Rights Act (FRA) land claims and compliance data.</li><li>Implemented interactive geospatial dashboards using React.js and Leaflet.js for dynamic map rendering.</li><li>Developed backend services to serve spatial datasets and map layers through REST APIs.</li><li>Designed spatial databases using PostgreSQL/PostGIS enabling efficient geospatial querying and analysis.</li><li>Automated GIS data processing workflows using Python for generating spatial reports.</li></ul>                    |      |
| <b>GyaanSetu – Offline AI Learning Platform</b><br><i>React Native, Expo, FastAPI, FAISS, Sentence Transformers, Node.js</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 2026 |
| <ul style="list-style-type: none"><li>Developed an offline-first AI learning platform delivering STEM tutoring in regional languages using React Native.</li><li>Implemented a Retrieval-Augmented Generation (RAG) pipeline using Sentence Transformer embeddings with FAISS vector search for offline question answering.</li><li>Built AI inference APIs using FastAPI to handle embedding generation, retrieval, and response orchestration.</li><li>Engineered document ingestion pipelines using OCR and PDF parsing tools to convert educational PDFs into searchable knowledge bases.</li></ul> |      |

## EXTRA CURRICULAR

- Team Lead in Multiple Hackathons** — Led teams of 4–6 members managing planning, task allocation, and project delivery.
- Domain Coordinator, InC (PICT Flagship Event)** — Coordinated logistics for 100+ participants, volunteers, and judges.
- Design Ideation & Social Media** — Contributed to branding and outreach for the PICT ACM Student Chapter.
- Educator, EVidyalyoka NGO** — Taught logical reasoning and mathematics to rural students through online sessions.
