EDUCATION

Pune Institute of Computer Technology, Pune Bachelor of Engineering, Electronics and Telecommunication Engineering	2023 – 2027
Savitribai Phule Junior College, Nagpur Higher Secondary Education	2021 – 2023
St. Claret School, Nagpur Secondary Education	2020 – 2021

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, C++
Frontend / Mobile: React.js, React Native, Expo, HTML, CSS
Backend: Node.js, Express.js, FastAPI
Databases: MongoDB, PostgreSQL, PostGIS, MySQL
Tools & Platforms: Git, Firebase, VS Code

PROJECTS

EcoSarathi – Voice-Based Public Grievance System <i>React.js, Node.js, Express.js, MongoDB, NLP</i>	2025
- Developed a full-stack grievance redressal platform enabling users to submit and track complaints through voice inputs in Hindi and Hinglish. - Designed modular React components for complaint submission, tracking, and dashboard visualization. - Implemented RESTful backend APIs using Node.js and Express.js to manage complaint workflows and user requests. - Modeled MongoDB schemas to store structured complaint reports generated from NLP processing pipelines.	
VanAtma Portal – AI-powered FRA WebGIS Platform <i>React.js, Node.js, Leaflet.js, PostgreSQL/PostGIS, Python</i>	2025
- Built a full-stack WebGIS platform to visualize Forest Rights Act (FRA) land claims and compliance data. - Implemented interactive geospatial dashboards using React.js and Leaflet.js for dynamic map rendering. - Developed backend services to serve spatial datasets and map layers through REST APIs. - Designed spatial databases using PostgreSQL/PostGIS enabling efficient geospatial querying and analysis. - Automated GIS data processing workflows using Python for generating spatial reports.	
GyaanSetu – Offline AI Learning Platform <i>React Native, Expo, FastAPI, FAISS, Sentence Transformers, Node.js</i>	2026
- Developed an offline-first AI learning platform delivering STEM tutoring in regional languages using React Native. - Implemented a Retrieval-Augmented Generation (RAG) pipeline using Sentence Transformer embeddings with FAISS vector search for offline question answering. - Built AI inference APIs using FastAPI to handle embedding generation, retrieval, and response orchestration. - Engineered document ingestion pipelines using OCR and PDF parsing tools to convert educational PDFs into searchable knowledge bases.	

EXTRA CURRICULAR

- Team Lead in Multiple Hackathons** — Led teams of 4–6 members managing planning, task allocation, and project delivery.
- Domain Coordinator, InC (PICT Flagship Event)** — Coordinated logistics for 100+ participants, volunteers, and judges.
- Design Ideation & Social Media** — Contributed to branding and outreach for the PICT ACM Student Chapter.
- Educator, EVidyalyoka NGO** — Taught logical reasoning and mathematics to rural students through online sessions.
